

## Process Engineer (m/f) / Verfahrenstechniker (m/w)

### About YARA

We at Yara are part of a global network, collaborating to profitably solve some of the world's key challenges - resource scarcity, food insecurity and environmental change.

### About the Unit

YARA Environmental Technologies GmbH is the centre for basic / detail engineering and turnkey solutions of SCR & SNCR DeNOx systems for power applications. With over 560 systems installed globally our flue gas cleaning systems are used for the efficient removal of pollutants from flue gas using catalytic & non-catalytic denitrification processes. Hazardous substances (NOx, SOx, Hg, Dioxin, etc.) are substantially reduced through an ideal combination of our systems to provide tried-and-tested, leading-edge technologies for environment-friendly power plants and industrial applications.

The department "Stationary" within the Business Unit Environmental Solutions has around 100 employees located in Austria, China/Taiwan, Germany, Sweden and Poland.

### Your Responsibilities

We are looking for an engineering expert who designs production processes and facilities for mid to large-scale projects and provides expert input to the development and management of those projects.

#### Main Responsibilities:

- Providing technical support during sales and project execution
- Preparing/Dimensioning/Checking process related equipment (incl. drawings and documentation)
- Ensure compliance of the design with relevant regulation, codes and standards
- Coordination of technical tasks within discipline and communication and interfaces with other disciplines
- Contribute to the product development and standardization
- Performs/Assists in the technical training (internal and external)
- Leads/Assists in commissioning, after sales service and trouble shooting

### Your Profile

- Graduated from technical university or technical high school
- Expert in Process Engineering (preferred for Land-based applications)
- Experience in Process Design and preparing related Calculations (preferable for power or environmental equipment)
- At least 5 years working experience in similar position
- Good knowledge of Office applications and ACAD
- Good communication and problem solving skills
- German and English required

### What we offer

- An overpayment regarding your qualification and job experience
- A permanent contract
- The opportunity to work on sustainable solutions that benefit mankind and the environment

### Additional information

The position is located in Vienna / Austria and reports directly to the Team Coordinator Process Engineering.

The salary is based on the valid KV agreement. Depending on the qualification and experience, there is a strong willingness for a significant overpayment.

If you are fulfilling the requirements and are eager to take a challenging task in an international environment, then we are happy to receive your application in English with mentioned details such as your possible starting date and salary expectations.
