

UNIHA is a specialised company for designing and erecting water treatment plants. Our clients are industries and municipalities, our projects are located in Asia, Africa and Europe. In order to strengthen our team in Linz/Austria, we are looking for a:

Process Engineer (m/f) / Verfahrenstechniker (m/w)

Main responsibilities:

- Process basic design of water treatment processes: flow diagrams, PID, bill of quantities, layout, philosophy of control, equipment specifications, commissioning/operation/maintenance manuals, etc.
- Providing technical support during sales and project execution
- Plant commissioning supervision
- Optimisation and development of UNIHA products and services

Your profile:

- BSc/MSc process/chemical/water engineering (TU/FH) or comparable qualification
- Good knowledge about process design, plant engineering and water chemistry
- Precise and self-reliant working style
- Good knowledge of MS Office applications and CAD/CAPE tools
- Willingness to travel
- Good communication and problem solving skills
- English required, other language skills advantageous

You are looking for a challenging task in an international environment, working with the most valuable resource on our planet? Then send your application including your possible starting date and salary expectations by email to Mrs. Korab, korab@uniha.at.
